EXPERIENCE

Turner Broadcasting System

CNN – Fall Web Development Intern | August 2018 - Current

- Working on massive transition from CNNMoney to CNN Business by handling redirects for traffic, developing responsive components using NodeJS, JavaScript and responsive designs to correspond with new stack for CNN. Managed Jira tickets for bug fixes as well as features added to navigation and main site. Used Agile methodologies with the CNN Business team to keep updates for team objectives.
- Creative development in Turner's GTO presentation for Turner's Chief Technology Officer, presenting business goals and program objectives along with providing solutions that better serve the Turner brand.

Memorial Sloan Kettering Cancer Center

Systems Engineering Intern | June 2018 – August 2018

- Created a testing application monitoring the RESTful APIs across Memorial Sloan Kettering including the Jitney, Patient Vitals, apps and portals.
- Dashboard creation using responsive design incl. Bootstrap, ASPX .NET, Telerik Kendo UI, JS and JQuery. Creation of databases using SQL Server and testing with Postman. Backend created with NodeJS/Express.
- Logged data into an intuitive dashboard that can be accessed by the internal staff across MSK with plans on authentication and seamless single-sign-on for API usage in the future.

Rideline Inc.

Co-Founder | May 2013 – October 2017

- Developed and grew a luxury transportation service serving Long Island and New York City. As the co-founder, I helped manage a team of 6 in creating, marketing and generating leads in addition to studying Front-end development, web marketing such as: Google Analytics and Search Engine Optimization.
